

Fandy Maroc Farine becomes the first mill to obtain the Health Authorization from the ONSSA

Casablanca, the 15th January, 2014

Following an audit conducted by the National Health Security Office for Food Products (ONSSA), Fandy Maroc Farine, a subsidiary of Anouar Invest group, becomes the first mill in Morocco to obtain the Health Authorization by the ONSSA.

As a reminder, Fandy Maroc Farine is the first company to have certified its milling activities in Morocco : ISO 22000 v. 2005 and ISO 9001 v. 2000.

The sanitary authorization, has once again firmed up the commitment of Fandy Maroc Farine in favor of safety and sanitary hygiene of food, in compliance with national standards as well as with its customers expectations. It also reflects the company's sustained attention towards the constant improvement and optimization of its procedures and the reliability of its operations.

During its audit, the ONSSA has thoroughly assessed the compliance to Moroccan standards by Fandy Maroc Farine, but also the staff hygiene conditions within the company, their good health practices, cleanliness of premises and cleaning procedures. The Body has also analysed the safety of the use draw materials and products as well as their traceability, not to mention the application terms of self-monitoring programs.

With regards to the sanitary authorization, Mr. Abbes NAJMI, General Manager of Fandy Maroc Farine, said : « We have been complying with very strict national regulations for years and we felt time had come for us to be audited by the ONSSA body, to allow us to demonstrate to our customers our commitment in terms of quality. This approach stems from our corporate strategy, which is primarily aimed at satisfying our partners and sustain our company's competitiveness. »

About Fandy

Fandy has the largest milling capacity of Morocco through its production units "Fandy Maroc Farine" in Casablanca, "Fandy Nahda" in Tangier and "Fandy Souss" in Agadir. These three plants are part of the most modern mills in Africa, with production means at the forefront of technology. Key player in a highly competitive market, Fandy has built its success on diversified, innovative product lines capable of responding to all customer requests. Thanks to a permanent concern for quality and food safety, Fandy Maroc Farine is the first African industrial milling plant to get the ISO 22000 version 2005 and the ISO 9001 version 2000 certifications. Via Copragri Fandy, the Anouar Invest Group also positions itself as the main wheat importer in Morocco. This subsidiary provides supplies for millers, semolina millers and feed producers through an offer that guarantees the best market quality as well as highly stringent procurement procedures. In December 2012, after having competed alongside 65 other Moroccan brands, Fandy was crowned "Best Moroccan Factory Brand" at the « Morocco Awards 2012 ».
